PROFILE

I'm a front-end web developer based in Toronto. I come from an IT background with an emphasis on customer service. I have been ingrained with the philosophy that client satisfaction is undoubtedly the most important aspect of any business. My mission now is to secure a position with a reputable company where I can be a member of a team and utilize my knowledge, strong resourcefulness and previous work experience to help the company advance efficiently and productively.

EXPERIENCE

TECHNICAL SUPPORT ANALYST

Scotiabank | April 2016 - April 2019

- Provided technical support to Scotia Connect clients with payment creations, registrations and general navigation
- Trusted with the task of training and mentoring new hires in order to get them job ready
- Collaborated with own team and external teams during daily payment cutoff times in order to verify payment processing and ensure client satisfaction

TECHNOLOGY MENTOR

Centennial College | September 2014 - August 2015

- Provided support to students using technology in the Resource Centre
- Performed maintenance and troubleshooting on heavy duty printers, photocopiers, desktop computers, netbooks and laptops
- Provided assistance with the operation of adaptive technology and the use of media rooms in the Resource Centre
- Created various documents and wrote instructions for students and staff on how to perform simple computer fixes such as: adding printers and navigating through printer properties in order to make changes and personalize documents.

FEATURED WORK

GUITAR CHORDS APP

Made with: React | Firebase | HTML5 | CSS3

An app built with React that shows users pictures of how to play guitar chords. Users click on individual buttons and an image is rendered onto the screen. Users can leave comments below which are stored in Firebase

GAME OF THRONES QUIZ

Made with: JQuery | SASS | HTML5

An app built with JQuery that allows users to answer 5 personality questions and, based on their answer, are then shown a matching character from the show
